WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 1. Vol. XCVIII. Week Ended Saturday, 6th January, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 278—143 boys and 135 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 226. Of these deaths, 5 were due to tuberculosis and 35 to malignant neoplasms. There were 6 accidental deaths, 2 of which were due to transport accidents, one to burns and one to drowning. There was one suicide.

Among the deaths of infants under one year, 3 were due to injury at birth, 2 to congenital malformation, 2 to prematurity, one to haemolytic disease, one to pulmonary haemorrhage, one to pneumonia, one to empyema thoracis and one to mongolism.

The total number of births registered during the week in the principal towns was 518—259 boys and 259 girls, of which 134 boys and 123 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 344, of which 161 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 6th JANUARY, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 4. Vol. XCIX. Week Ended Saturday, 27th January, 1962. Price 2d. Net

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 531—260 boys and 271 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 251. Of these deaths, 3 were due to tuberculosis and 30 to malignant neoplasms. There were 4 accidental deaths, 3 of which were due to transport accidents.

Among the deaths of infants under one year, 4 were due to congenital malformation, 3 to pneumonia, 3 to prematurity, 3 to injury at birth, one to gastro-enteritis, one to haemolytic disease and one to atelectasis.

The total number of births registered during the week in the principal towns was 848—432 boys and 416 girls, of which 307 boys and 304 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 378, of which 216 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 27th JANUARY, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 5. Vol. XCIX. Week Ended Saturday, 3rd February, 1962. Price 2d. Net

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns,* i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 397—198 boys and 199 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 217. Of these deaths, 2 were due to tuberculosis and 34 to malignant neoplasms. There were 5 accidental deaths, one of which was due to a transport accident, one to carbon monoxide poisoning, and one to burns. There was one suicide.

Among the deaths of infants under one year, 4 were due to pneumonia, 2 to prematurity, 2 to congenital malformation and 2 to atelectasis.

The total number of births registered during the week in the principal towns was 695—369 boys and 326 girls, of which 202 boys and 177 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 314, of which 173 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 3rd FEBRUARY, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 7. Vol. XCIX. Week Ended Saturday, 17th February, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns,* i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 340—156 boys and 184 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 197. Of these deaths, 2 were due to tuberculosis and 27 to malignant neoplasms. There were 4 accidental deaths, one of which was due to a transport accident, one to burns, and one to drowning.

Among the deaths of infants under one year, 9 were due to pneumonia, 6 to congenital malformation, 4 to atelectasis, 2 to haemolytic disease, 2 to prematurity, one to bronchitis and one to enlarged thymus.

The total number of births registered during the week in the principal towns was 693—318 boys and 375 girls, of which 173 boys and 187 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 308, of which 168 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday 17th FEBRUARY, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 9. Vol. XCIX. Week Ended Saturday, 3rd March, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns,* i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 338—192 boys and 146 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 182. Of these deaths, one was due to tuberculosis and 29 to malignant neoplasms. There were 3 accidental deaths, one of which was due to a drowning accident.

Among the deaths of infants under one year, 4 were due to atelectasis, 3 to congenital malformation, 2 to injury at birth, 2 to prematurity, one to haemolytic disease, one to hyaline membrane disease, one to otitis media and one to pneumonia.

The total number of births registered during the week in the principal towns was 664—360 boys and 304 girls, of which 178 boys and 175 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 264, of which 134 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 3rd MARCH, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 10. Vol. XCIX. Week Ended Saturday, 10th March, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns,* i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 468—252 boys and 216 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 201. Of these deaths, 4 were due to tuberculosis and 37 to malignant neoplasms. There were 2 accidental deaths, which were due to carbon monoxide poisoning.

Among the deaths of infants under one year, 4 were due to atelectasis, 4 to congenital malformation, 2 to pneumonia, 2 to mongolism, one to prematurity and one to injury at birth.

The total number of births registered during the week in the principal towns was 831—429 boys and 402 girls, of which 239 boys and 211 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 337, of which 172 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 10th MARCH, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 13. Vol. XCIX. Week Ended Saturday, 31st March, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, 498—247 boys and 251 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 195. Of these deaths, 3 were due to tuberculosis and 36 to malignant neoplasms. There was one accidental death, which was due to burns. There was one suicide.

Among the deaths of infants under one year, 4 were due to pneumonia, 2 to injury at birth, 2 to atelectasis and one to congenital malformation.

The total number of births registered during the week in the principal towns was 863—435 boys and 428 girls, of which 306 boys and 283 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 297, of which 163 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 31st MARCH, 1962, which were assigned to the Principal Towns with similar particu lars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 16. Vol. XCIX. Week Ended Saturday, 21st April, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns,* i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns was 469—243 boys and 226 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 180. Of these deaths, 2 were due to tuberculosis and 33 to malignant neoplasms. There were 6 accidental deaths, one of which was due to a transport accident, one to drowning and one to burns.

Among the deaths of infants under one year, 3 were due to prematurity, 3 to congenital malformation, one to pnuemonia and one to atelectasis.

The total number of births registered during the week in the principal towns was 863—458 boys and 405 girls, of which 210 boys and 189 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 282, of which 129 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 21st APRIL, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 19. Vol. XCIX. Week Ended Saturday, 12th May, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns,* i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns was 506—269 boys and 237 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 187. Of these deaths, 3 were due to tuberculosis and 35 to malignant neoplasms. There were 3 accidental deaths, one of which was due to drowning.

Among the deaths of infants under one year, 7 were due to congenital malformation, 2 to pnuemonia, one to prematurity, one to injury at birth and one to gastro-enteritis.

The total number of births registered during the week in the principal towns was 873—452 boys and 421 girls, of which 286 boys and 222 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 300, of which 161 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 12th MAY, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 22. Vol. XCIX. Week Ended Saturday, 2nd June, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns,* i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 423—225 boys and 198 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 112. Of these deaths, 25 were due to malignant neoplasms. There were 3 accidental deaths, one of which was due to a transport accident.

Among the deaths of infants under one year, 4 were due to congenital malformation, 2 to pneumonia, one to birth injury, one to haemolytic disease and one to prematurity.

The total number of births registered during the week in the principal towns was 707—364 boys and 343 girls, of which 231 boys and 221 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 194, of which 105 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 2nd JUNE, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 25 Vol. XCIX. Week Ended Saturday, 23rd June, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 533—253 boys and 280 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 158. Of these deaths, 3 were due to tuberculosis and 26 to malignant neoplasms. There were 4 accidental deaths, two of which were due to transport accidents.

Among the deaths of infants under one year, 5 were due to congenital malformation, 2 to enteritis, 2 to prematurity, 2 to rhesus incompatability, one to atelectasis, one to pneumonia and one to septicaemia.

The total number of births registered during the week in the principal towns was 980—492 boys and 488 girls, of which 239 boys and 253 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 259, of which 135 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 23rd JUNE, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 28. Vol. XCIX. Week Ended Saturday, 14th July, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 354—176 boys and 178 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 164. Of these deaths, 3 were due to tuberculosis and 29 to malignant neoplasms. There were 6 accidental deaths, 3 of which were due to transport accidents. and one to drowning.

Among the deaths of infants under one year, 5 were due to prematurity, 4 to pneumonia, 3 to congenital malformation and 2 to gastro-enteritis.

The total number of births registered during the week in the principal towns was 690—353 boys and 337 girls, of which 165 boys and 168 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 257, of which 148 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 14th JULY, 1962 which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 30. Vol. XCIX. Week Ended Saturday, 28th July, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 434—209 boys and 225 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 141. Of these deaths, 2 were due to tuberculosis and 33 to malignant neoplasms. There were 7 accidental deaths, one of which was due to a transport accident and 2 to carbon monoxide poisoning.

Among the deaths of infants under one year, 2 were due to injury at birth, 2 to congenital malformation, one to prematurity, one to atelectasis and one to gastro-enteritis.

The total number of births registered during the week in the principal towns was 774—376 boys and 398 girls, of which 217 boys and 220 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 240, of which 111 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 28th JULY, 1962 which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 31. Vol. XCIX. Week Ended Saturday, 4th August, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 502—241 boys and 261 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 146. Of these deaths, 4 were due to tuberculosis and 25 to malignant neoplasms. There were 3 accidental deaths, one of which was due to drowning.

Among the deaths of infants under one year, 4 were due to congenital malformation, 3 to pneumonia, 2 to injury at birth, one to prematurity, one to atelectasis, one to gastro-enteritis and one to septicaemia.

The total number of births registered during the week in the principal towns was 923—454 boys and 469 girls, of which 260 boys and 275 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 221, of which 122 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 4th AUGUST, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 34. Vol. XCIX. Week Ended Saturday, 25th August, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 401—204 boys and 197 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 139. Of these deaths one was due to tuberculosis and 28 to malignant neoplasms. There were 4 accidental deaths, one of which was due to a transport accident and one to carbon monoxide poisoning.

Among the deaths of infants under one year, 4 were due to congenital malformation, one to gastro-enteritis and one to prematurity.

The total number of births registered during the week in the principal towns was 734—368 boys and 366 girls, of which 199 boys and 204 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 211, of which 128 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 25th AUGUST, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 37. Vol. XCIX. Week Ended Saturday, 15th September, 1962. Price 2d. Net

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 416—203 boys and 213 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 144. Of these deaths, 2 were due to tuberculosis and 28 to malignant neoplasms. There were 5 accidental deaths, 2 of which were due to transport accidents and one to carbon-monoxide poisoning.

Among the deaths of infants under one year, 2 were due to prematurity, 2 to atelectasis, 2 to pneumonia, one to gastro-enteritis,one to congenital malformation and one to injury at birth.

The total number of births registered during the week in the principal towns was 747—357 boys and 390 girls, of which 187 boys and 214 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 217, of which 115 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 15th SEPTEMBER, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 40. Vol. XCIX. Week Ended Saturday, 6th October, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 323—163 boys and 160 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 154. Of these deaths, 2 were due to tuberculosis and 26 to malignant neoplasms. There were 2 accidental deaths, one of which was due to carbon monoxide poisoning.

Among the deaths of infants under one year, one was due to congenital malformation, one to septicaemia, one to pneumonia, one to prematurity, one to gastro-enteritis, one to haemorrhagic disease of new born, one to birth injury and one to asphyxia.

The total number of births registered during the week in the principal towns was 572—286 boys and 286 girls, of which 148 boys and 150 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 252, of which 121 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 6th OCTOBER, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 42. Vol. XCIX. Week Ended Saturday, 20th October, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 546—268 boys and 278 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 145. Of these deaths, 27 were due to malignant neoplasms. There were 3 accidental deaths, one of which was due to a transport accident and one to carbon monoxide poisoning.

Among the deaths of infants under one year, 4 were due to congenital malformation, 3 to birth injury, 2 to prematurity, 2 to atelectasis, one to gastro-enteritis and one to pnuemonia.

The total number of births registered during the week in the principal towns was 998—504 boys and 494 girls, of which 272 boys and 275 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 259, of which 124 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 20th OCTOBER, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 43. Vol. XCIX. Week Ended Saturday, 27th October, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns, was 442—221 boys and 221 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 135. Of these deaths, 32 were due to malignant neoplasms. There were 5 accidental deaths, one of which was due to a transport accident, one to carbon monoxide poisoning and one to drowning.

Among the deaths of infants under one year, one was due to prematurity and one to rhesus incompatibility.

The total number of births registered during the week in the principal towns was 727—367 boys and 360 girls, of which 216 boys and 216 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 209, of which 122 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 27th OCTOBER, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 46. Vol. XCIX. Week Ended Saturday, 17th November, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns was 430—224 boys and 206 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 132. Of these deaths, 4 were due to tuberculosis and 22 to malignant neoplasms. There were 3 accidental deaths, one of which was due to drowning.

Among the deaths of infants under one year, 4 were due to congenital malformation, 3 to prematurity, 2 to atelectasis, one to pneumonia and one to septicaemia.

The total number of births registered during the week in the principal towns was 776—404 boys and 372 girls of which 188 boys and 165 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 239, of which 116 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 17th NOVEMBER, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

WEEKLY RETURNS OF BIRTHS AND DEATHS

FOR THE

PRINCIPAL TOWNS

Compiled by the Central Statistics Office

To be purchased through any Bookseller or directly from

THE GOVERNMENT PUBLICATIONS SALE OFFICE, G.P.O. ARCADE, DUBLIN

No. 49. Vol. XCIX. Week Ended Saturday, 8th December, 1962. Price 2d. Net.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the week, to persons normally residing in the principal towns was 285—166 boys and 119 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 161. Of these deaths one was due to tuberculosis and 30 to malignant neoplasms. There were 4 accidental deaths, 2 of which were due to transport accidents.

Among the deaths of infants under one year, 3 were due to pneumonia, 2 to congenital malformation and one to meningitis.

The total number of births registered during the week in the principal towns was 549—282 boys and 267 girls of which 158 boys and 134 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 240, of which 142 were registered in Dublin County Borough.

TABLE 1.—BIRTHS and DEATHS registered during the week ended Saturday, 8th DECEMBER, 1962, which were assigned to the Principal Towns with similar particulars for Belfast and Derry.

PRINCIPAL TOWNS

Particulars of births and deaths recorded for the *Principal Towns*, i.e. the fourteen towns of over 10,000 population, are given in Table 1. The figures for deaths shown in respect of each town relate to persons who normally resided in that town, while deaths of non-residents have been excluded. Similarly only the figures for births to mothers normally residing in each town are given in Table 1. Deaths classified by age and cause are shown in Table 2.

The number of births registered during the two weeks, to persons normally residing in the principal towns was 709—358 boys and 351 girls.

The number of deaths registered, of persons normally residing in the principal towns, was 271. Of these deaths 6 were due to tuberculosis and 50 to malignant neoplasms. There were 9 accidental deaths, 4 of which were due to transport accidents, and one to carbon monoxide poisoning.

Among the deaths of infants under one year, 4 were due to gastro-enteritis, 3 to pneumonia, 2 to atelectasis, one to prematurity, and one to birth injury.

The total number of births registered during the week in the principal towns was 1247—651 boys and 596 girls of which 374 boys and 330 girls were registered in Dublin County Borough.

The total number of deaths registered in the principal towns was 405, of which 224 were registered in Dublin County Borough.

TABLE 1. BIRTHS and DEATHS registered during the two weeks ended Saturday, 29th DECEMBER, 1962, which were assigned to the Principal towns with similar particulars for Belfast and Derry.
